Doc 4

GUAJOLOTE RANCH
SHEEP HILL
DILLEY
TEXAS

Dear Dr. Seel:

That contour map - the size of the big blue print - Campus Plans I displayed in 156 Fifth and which you took over - is not in Straight's office.

I remember now that he sent it on down to me with the elevation of every building noted of all the 100 bldgs. It was on my office wall till I left in 1937. I shall try further through Dr. Morris to find it for you. It must be in some box or bundle stored away in some nook of Margins Science Hall. Maybe Mr. Kaiser has been able to locate it. He told me where the other blue prints were in an open box under the balcony of M-Science Hall. It must be

some where there. I shall write
Knox; maybe I can describe it
so as he can recall where he placed
it. The portion you have was the
original Contour map - which was ^{twice} added
to when I bought more land. The
contours as far as they go are cor-
rect. The blags thereon are simply
a sketch made by Mr. Straight
and sent to me before he visited
the grounds.

I do hope we can
locate them. Please have someone
who knows enough when he finds
it, to recognize it - to look in
the store rooms etc in No 3. Hall. I
believe you will locate it. Let's
keep on hoping and looking till it
turns up - I can't believe it was
destroyed. Keep like gold the one
you have.

Cordially yours

Gracie Davis
